Re; RCRA Inspection of 5/6/86
MID 981189020

Dear Mr. Sygo:

This letter is in response to your letter dated May 16, 1986, we expect to be able to comply in correcting the violations, below is how we propose to meet the standards:

1. We have found that when employee's fill drums their may be some overflow, to halt this problem we have engineered a tray which the drums set into and will collect all overflow material when filling drums.
2. I have contacted Special Waste Systems, Inc., Detroit, Michigan, a Mr. Kenneth Smith, they have taken several soil samples to analize and will remove the contamated soil if found to be tainted, to a proper disposal.
3. Proper records and training are being established to comply with 40 CFR 256.16 .
4. We have in service an inspection log for the inspection of the containers in the storage area.
5. I have contacted our communication contractor to install an internal alarm system capable of providing immediate emergency instructions.
6. Our contingency plan has been drafted and we are working on an emergency procedures plan.
7. We have contacted a contractor to construct our storage area to comply with 40 CFR 264.175.

I believe this should meet with your approval, if you have any questions please contact me

Sincerely,

Larry Weemaes
